Mohaiminul Islam

Ontario, Canada | (437) 255-5956 | mohaiminulfahim17@gmail.com

PROFESSIONAL SUMMARY

Dedicated and highly technical IT Support Professional with a Graduate Certificate in IT Solutions and a background in Electrical Engineering. Extensive experience in troubleshooting complex hardware, software, and networking issues across Windows, MacOS, and Linux environments. Proficient in server administration, automation via Bash scripting, and managing ITSM ticketing databases to ensure high first-call resolution rates. Committed to providing superior user support, maintaining system uptime, and implementing technical solutions that enhance organizational productivity and security in demanding, high-volume atmospheres.

TECHNICAL SKILLS

- Systems & OS: Windows Server, MacOS, CentOS, Linux
- IT Support & ITSM: Tier 1/Tier 2 Support, Help Desk, SLA Management, Escalation Paths, VPN, Remote Desktop (RDP), Active Directory, Microsoft 365
- Networking: TCP/IP, DNS, DHCP, Network Administration, Hardware Troubleshooting
- Scripting & Dev: Bash, Python, SQL, MongoDB, JavaScript, Node.js, Golang, GitHub, Power BI

PROFESSIONAL EXPERIENCE

Technical Advisor | Concentrix Inc. | May 2024 – Feb 2026

- Provided Tier 1/Tier 2 inbound technical support via phone and chat, resolving hardware, software, and network issues for a high-volume customer base.
- Maintained 100% case documentation in call tracking database with detailed notes, ensuring SLA compliance and complete technical history.
- Utilized escalation paths to resolve technical issues and perform follow-up outbound communication to ensure client satisfaction.

IT Engineer | SSD-TECH | Oct 2020 - Sept 2021

- Configured Linux servers and provided real-time monitoring to ensure 99.9% uptime for global clients.
- Developed customized Bash scripts to automate server maintenance, improving efficiency and reducing manual labor by 40%.
- Administered SQL databases, ensuring data integrity and secure accessibility for critical business reporting.

Customer Service Manager | Walmart | Jan 2026 - Present

- Managed front-end operations by overseeing cashier scheduling and analyzing transaction data for process improvements.
- Administered deactivation logs and EAS systems while providing technical training to associates on register systems and scanning accuracy.
- Led corporate program initiatives and safety protocols to enhance operational productivity and compliance.

TECHNICAL PROJECTS

Golang JWT Authentication System | Technical Project |

- Developed a user authentication system using JSON Web Tokens (JWT) in Golang with the Gin framework.
- Utilized MongoDB for data storage and management, allowing secure user registration and login functionality.

Capstone Project | Bayxis Capital |

- Designed and implemented a Python automation engine that exhibited exceptional accuracy in identifying tickers.
- Mastered the utilization of Supabase, seamlessly integrating it with FastAPI to create robust web applications on React and Node.js.
- Contributed to both front-end and back-end development efforts to ensure well-rounded technical delivery.

EDUCATION

- Graduate Certificate, IT Solutions | Humber College | Aug 2023
- BSc. in Electrical Electronic & Communication Engineering | Bangladesh University of Professionals | Nov 2019
